CAREER SUMMARY

Self-taught, I've had the opportunity to work with a number of different clients from musicians, to fashion designers, couples getting married, and entrepreneurs in all walks of life. My freelance photography has taken me through a myriad of experiences spanning the United States. I've worked with people who didn't speak my language or were skeptical when I walked in for the gig. I've evoked authentic emotion from those folks. I've helped share the stories of women and minority-owned businesses.
